1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 3, 5, 6, 11, and 12, are rejected under 35 U.S.C. 103(a) as being unpatentable over Kawakami.

Kawakami teaches the claimed search and rescue beacon including: main transmitter (6) transmitting a Cospas-Sarsat signal (column 1, lines 20-50) at a main frequency and an auxiliary homing transmitter (1) transmitting at a homing signal at a homing frequency "close" to said main frequency.

To increase the range of the system of Kawakami, the system of Kawakami can obviously operate in the claimed frequency range.

2. Claims 2, 4, 7-10, 13, and 14, are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
